Evidence

(American Casebook Series)

By

Edward W. Hinton
University of Chicago Law School

This new volume is one of the widely known and extensively used American Casebook Series. The material contained in this volume has been very carefully collected and painstakingly edited by Professor Hinton, so as to touch upon every phase of the law of evidence, and set forth the principles involved in as clear a manner as possible

The topics covered are in the main divided into four groups

First. The respective functions of the judge and jury, and the development of various methods for controlling the action of the jury

Second. The rules prescribing the qualifications of witnesses and governing their examination when testifying

Third. Various rules of policy excluding a great deal of evidential material from consideration by the jury.

Fourth. Certain substantive rules, governing the construction and legal effect of contracts, conveyances, and other operative writings, which have long been expressed in terms of evidence

This volume should prove a valuable addition to the library of every practicing attorney who is especially interested in the law of evidence, as well as all law students
